

City of Chicago Permitting Web Portal: Supported Departments & Application Types

Summary

This document defines the departments and the subset of their permit application processes that are currently supported by the City of Chicago's Online Permitting Portal at <https://ipi.cityofchicago.org/Profile>.

Some application types have professional license requirements in order for you to be able to apply for them. If you have reached the page in the Permitting Web Portal where you select the type of application you wish to complete, and you do not see the application type that you are looking for, this may be because your web account needs to be associated to your company, or because you or your company have not been configured with the license necessary to apply for that type of permit. This document also outlines the rules that must be met to apply for each type of permit.

Supported Departments and Application Types

CDOT

Application Type	Required for Application
Public Way Opening Permit	Public Way Work License and Insurance
Occupy the Public Right of Way Permit	Insurance
